WHO WE ARE

Amfco is an All-India Representative of selected prestigious International Companies and as part of its representation, it provides an array of services, products, and business solutions giving them a smooth entry into the lucrative Indian market ensuring their products reap rich dividends. Amfco's business is currently spanned across three verticals namely Services, Trading and ALL HUB. Amfco's constant strive for introducing new quality products to its portfolio in the liquid logistics industry has led to its steady growth, valued customer support and has recognized it as an industry leader.

INTRODUCTION

Under our vertical of Services, Amfico's forte has been in the movement of liquid logistics, ISO Tank container fleet management & maintenance, testing, cleaning coating and storage.

Chemicals are usually volatile, corrosive, flammable and easily destabilised, hence they need special handling to retain their characteristics and ensure they are not compromised during transport. Amfico has under its wings the expertise of dealing with such chemicals in 20 and 40 foot containers.

As oxygen demand surged in the country during the COVID 19, Amfico facilitated the logistics for cryogenic tanks that were airlifted with the support of the IAF from Thailand to India for the oxygen needs in India.

As part of its international representation, Amfico is the sole representative of UK's largest privately owned specialist logistics company M/s Suttons International for two decades.

Our representation also extends towards another mode of logistics that is flexibags. We represent Infinity Bulk Liquid Solutions a Malaysian flexibag manufacturer and operator for the past few years.

Amfco as the sole representative of M/s Suttons International for two decades. Our specialty is the movement of hazardous, non-hazardous, specialist chemicals and gases efficiently with high standards of safety. As one of the many leading logistic operators in India, Amfco has the expertise to transport chemicals and liquids in bulk for the chemical industry to ensure secure transport services across India. This transportation is facilitated in various tanks such as ISO tanks, Baffle tanks and Lined tanks.

The Suttons Tank Containers are manufactured from stainless steel making the tank container suitable for the carriage of food grade products, non-hazardous chemicals and a large majority of hazardous products.

Other aspects of our specialty services include freight forwarding, custom clearance and transportation.

Flexitanks are specially designed for bulk liquid transportation. Compatible with almost all food grade product, a great solution to transport juices, wines, food grade liquid and shipping oils across the globe. Amfico Agencies represents Infinity Bulk Liquid Solutions a Malaysian flexibag manufacturer and operator for the past few years. The scope of our activities include import, stock, transport, customs clear, handling freight and fitting of the flexibags for customers as per their requirements.

Flexitanks are fabricated from FDA approved food grade Polyethylene and Polypropylene which are suitable for a wide range of non-hazardous liquid cargo. Every flexi is restrained by a Bulkhead that avoids the flexibag from coming out of the container when it is fully loaded. We ensure our customers' Supply Chain through the use of the same Flexitank from loading at the supplier's tank to the delivery at receiver's tank. Amfico is proud to be representing Infinity who is a responsible liquid logistics provider that ensures the Flexitanks are environment friendly. They do not contaminate the environment and are 100% recyclable.

Flexitanks are simple to install, light weight in structure, provide saving of over 30% - 40% and reduces the risk of contamination in comparison to other packaging method.

ISO Lease

The western coast of India (Gujarat & Maharashtra) has been the key hub for chemicals and petrochemicals production, alone accounting for over 60% market share across India

MNC's and local conglomerates, manufacturing liquid cargoes having strict safety norms have started reviewing their supply chain partners and switching over from road tankers to ISO Tanks for many of their critical chemicals, oils and products. Others have started using tanks for JIT (Just-in-Time) deliveries to their important customers. Many have started storing cargoes in Tank to increase their holding capacity

Considering it as a need of the hour situation, Amfco has started domesticating Tank Containers and offering the same for Local Storage and Transportation within India

The fleet consists of T11 / T14 / Baffle Tanks etc, depending on the specialised needs of the customers. These tanks are either lined with Chemline, or Amfco has electrified these tanks with Dirac cables, we can also customise tanks for tracking using SAAVY telematics

Amfco also can supply cryogenic tanks on lease if desired.

ARSHIYA

- All HUB provides customized drumming solutions to our shippers, consignees and logistic partners equipped with IBC/ Drum palletized filler for filling, foaming, charged, hazardous, non toxic and corrosive viscous cargo.
- Viscous line heated and insulated to reduce heat loss and increase efficiency. Equipped with steam lines for heating or melting product before drumming or delivering to the customer.
- Corrosive line- equipped with hastalloy wetted parts such as filling nozzle with nitrogen, fume hood and drip cup. Other parts are made of PTFE & Stainless Steel
- As part of our liquid logistics solutions, at ALL HUB Amfico - provides solutions for its customers to transfer viscous and corrosive cargoes from one containerized liquid carrier to another.
- AODD (Air Operated Double Diaphragm) Pump providing unique solution to critical pump applications with the most effective reliable and energy efficient service
- Ability to steam viscous cargoes in order to facilitate smooth transfer of said cargo.
